FOREWORD

INTRODUCTION
The Drug and Alcohol Registry of Treatment (DART) is an information and referral service available to service providers (medical, social, correctional, educational, pastoral, etc.) who are seeking treatment for clients with drug and/or alcohol problems. DART recently opened its 1-800 lines to members of the general public who are experiencing problems related to substance abuse. DART is designed to assist in finding suitable treatment within Ontario.

The service, which opened in October 1991, is funded by the Ontario Substance Abuse Bureau of the Ontario Ministry of Health and operates in London, Ontario. DART was developed by the Addiction Research Foundation (ARF) at the request of the Ministry of Health as part of the Ministry's strategy to make the addiction treatment services system more efficient. DART complements the process used by the Ontario Health Insurance Plan (OHIP) for the "prior approval" of payment for Ontario residents seeking drug or alcohol treatment in the United States.

DART provides comprehensive up-to-date status reports on the availability of a wide range of drug and alcohol treatment options, detailed descriptions of the types of treatment services, and referral procedures. Information is accessed via a toll-free telephone line (1-800-565-8603) and covers services such as detoxification, assessment and referral, outpatient treatment, day treatment, residential care and services for special populations.

DART staff search a computerized database that is updated regularly and includes information on 228 drug and alcohol treatment agencies in Ontario and the almost 1,300 different services they provide. Treatment agencies report regularly to DART about available or upcoming treatment spaces.

DART contributes statistical data to the development of public policy and strategic planning concerning drug and alcohol treatment on a provincial, regional or local basis. DART responds to requests from the Ministry of Health, District Health Councils, other planning bodies and treatment agencies for summaries of descriptive and statistical information from the DART database regarding the addiction treatment system in Ontario.

Consistent with the mandate of the Drug and Alcohol Registry of Treatment (DART), the 1995 - 1996 Directory of Alcohol and Drug Treatment Resources in Ontario has been extracted and compiled from the DART database. In collaboration with the Addiction Research Foundation (ARF), this Directory will be produced by DART every two years.

CRITERIA FOR INCLUSION IN DART
Generally, the DART database includes addiction-specific agencies in Ontario that:

- receive funding (in whole or in part) from the federal or provincial governments;
- offer a specialized treatment service for individuals with alcohol and drug problems;
- accept referrals from the community.

Agencies offering treatment for other types of addictions (e.g., smoking, food, gambling) and agencies specializing in addiction prevention or health promotion are not currently included in the DART database.

PURPOSE OF THE DIRECTORY
This Directory is compiled for use by individuals who need concise, current and comprehensive information concerning drug and alcohol treatment resources in Ontario. It is a resource for professionals working in addiction treatment and social service agencies, health professionals, employee assistance programs, community groups and the general public. For professionals, we hope the Directory will enhance your awareness of the range of addiction treatment resources and help you to serve your clients more effectively.

The Directory represents a "hard copy" of selected information contained in DART's database of addiction treatment agencies. It is not intended to replace use of the DART database, which offers more comprehensive information on the services provided by each agency and their availability. The DART database is updated on a regular basis and changes are made frequently to information about treatment agencies.
Listing of any agency in this Directory does not imply legitimization, authorization or endorsement by the Drug and Alcohol Registry of Treatment or the Addiction Research Foundation. Directory content is intended to be informative, not evaluative.

SCOPE OF THE DIRECTORY
In its main listings, the Directory includes all 228 agencies in the DART database as of January 1995. The Directory can capture only a portion of data on the addiction agencies, the treatment services they provide, and the activities associated with these services. The format of the Directory listings is similar to listings from the 1993 Directory.

DATA COLLECTION AND VERIFICATION
The content of the Directory was extracted from the DART database, which is continually being updated through contact with the staff of treatment agencies as information about their agencies and services changes. The entire database record of each agency is validated every six months. These Directory entries were verified by agency staff in January 1995.

FEEDBACK
We welcome comments regarding the presentation and content of the Directory.

AVANT-PROPOS

INTRODUCTION
Le service Drogue et alcool - Répertoire des traitements (DART) offre des renseignements et des recommandations aux fournisseurs de services (services médicaux, sociaux, correctionnels, éducatifs, religieux, etc.) à la recherche d'un traitement pour leurs clients aux prises avec des problèmes d'alcoolisme et de toxicomanie. DART a récemment étendu ses services aux membres du grand public aux prises avec des problèmes liés à la toxicomanie. DART aide les appelants à trouver un traitement approprié en Ontario.

Ce service, qui a été inauguré en octobre 1991, est parrainé par le Bureau ontalien de prévention de la toxicomanie du ministère de la Santé de l'Ontario et est situé à London en Ontario. DART a été mis au point par la Fondation de la recherche sur la toxicomanie, à la demande du ministère de la Santé, dans le cadre d'une stratégie visant à optimiser le réseau des services de traitement de la toxicomanie. DART complète la procédure utilisée par la Division de l'assurance-santé (autrefois l'OHIP) pour «l'autorisation préalable» du remboursement des résidants ontariens qui suivent un traitement aux États-Unis.

DART fournit des comptes rendus complets et à jour sur la disponibilité d'une vaste gamme de traitements de l'alcoolisme et la toxicomanie, des descriptions détaillées des services de traitement et procédures de recommandation. L'information est accessible par l'intermédiaire d'une ligne téléphonique sans frais (1-800-565-8603) et couvre un éventail de services dont la désintoxication, l'évaluation et l'orientation, le traitement en consultations externes, le traitement de jour, le traitement en établissement et les services à des populations particulières.

Pour effectuer ses recherches, le personnel de DART utilise une base de données informatisée qui est mise à jour régulièrement et contient des renseignements sur 228 organismes ontariens de traitement et les quelque 1 300 services qu'ils dispensent. Les organismes de traitement informent régulièrement le service DART des places qui sont déjà disponibles ou se libéreront sous peu.

DART fournit des données statistiques qui faciliteront l'élaboration des politiques gouvernementales et la planification stratégique en matière de traitement de l'alcoolisme et la toxicomanie, que ce soit à l'échelle provinciale, régionale ou locale. DART répond aux demandes du ministère de la Santé, des conseils régionaux de santé, et d'autres organismes de planification ou de traitement qui désirent un bref compte rendu de l'information descriptive et statistique sur le réseau ontarien de traitement de la toxicomanie.

Conformément au mandat du service Drogue et alcool - Répertoire des traitements (DART), le Répertoire 1995 - 1996 des ressources pour le traitement de l'alcoolisme et la toxicomanie en Ontario est compilé à l'aide de la base de données DART. Ce répertoire sera publié tous les deux ans par DART, en collaboration avec la Fondation de la recherche sur la toxicomanie.

CRITÈRES D’INCLUSION DANS LA BASE DE DONNÉES DART
La base de données DART contient de l'information sur les organismes ontariens spécialisés en toxicomanie. De manière générale, ces organismes :

- sont financés (en totalité ou en partie) par le gouvernement fédéral ou provincial;
- fournissent des services spécialisés de traitement aux personnes ayant un problème d'alcool ou de drogue;
- acceptent des recommandations provenant de la collectivité.

À l'heure actuelle, la base de données DART n'inclut pas les organismes qui offrent des traitements pour d'autres types de dépendance (p. ex. au tabac, au jeu, à la nourriture) et les organismes spécialisés en prévention de la toxicomanie ou en promotion de la santé.

OBJET DU RÉPERTOIRE
Ce répertoire est destiné aux personnes qui ont besoin d'un outil d'information concis et complet sur les ressources disponibles en Ontario dans le domaine du traitement de l'alcoolisme et de la toxicomanie. C'est une excellente ressource pour les professionnels à l'emploi des organismes de traitement de la toxicomanie et de services sociaux, les professionnels
de la santé, les programmes d’aide aux employés, les regroupements communautaires et le grand public. Dans le cas des professionnels, nous espérons que ce répertoire saura enrichir vos connaissances sur toute la gamme des ressources spécialisées en toxicomanie, et vous aidera à servir votre clientèle de manière plus efficace.

Ce répertoire est une version imprimée d’une sélection de renseignements contenus dans la base de données DART. Il n’est pas conçu en remplacement de la base de données DART, qui contient de l’information à jour et plus détaillée sur les services et la disponibilité de chaque organisme. La base de données DART est mise à jour régulièrement. De plus, les renseignements sur les organismes de traitement sont changés fréquemment.

Le fait que le nom d’un organisme figure dans le répertoire ne constitue pas une reconnaissance officielle, une autorisation, ni une recommandation de la part du service DART, ou de la Fondation de la recherche sur la toxicomanie. Le contenu du répertoire doit servir à l’information, et non à l’évaluation.

ÉTENDUE DU RÉPERTOIRE
Les listes principales du répertoire comprennent les 228 organismes que contenait la base de données DART au mois de janvier 1995. Le répertoire ne décrit qu’une partie des données fournies à la banque de données DART sur les organismes spécialisés en toxicomanie, leurs services de traitement et les activités associées à ces services. La présentation des descriptions est semblable à la présentation que l’on retrouve dans le répertoire 1993.

COLLECTE ET VÉRIFICATION DES DONNÉES
Le contenu du présent répertoire est tiré de la base de données DART, qui est constamment mise à jour à la suite des comptes rendus fournis par les organismes de traitement. Ces organismes nous font part de toute modification apportée à l’organisme même ou à ses services; le dossier informatisé de chaque organisme est vérifié et approuvé deux fois par année. La dernière vérification des données auprès des organismes s’est déroulée en janvier 1995.

COMMENTAIRES
Nous vous invitons à nous transmettre vos commentaires sur la présentation ou le contenu du répertoire. Veuillez écrire, téléphoner ou faire parvenir une télécopie au :

LIGNE D’INFORMATION SANS FRAIS INFO-ARF
Le centre d’information de la Fondation de la recherche sur la toxicomanie (la ARF), situé à Toronto, opère un système d’enregistrements audio portant sur une vaste gamme de sujets reliés aux drogues et à l’alcool. Les enregistrements sont tous traduits en français et certains messages sont multilingues.
HOW TO USE THE DIRECTORY

STRUCTURE
The addiction-specific agencies are listed geographically by the six District Health Council (DHC) Regions.

The six DHC regions are listed south to north. Within these regions, the cities in which the agencies are located appear in alphabetical order.

INDEXES/APPENDICES
Various indexes beginning on page 1-3 identify agencies by treatment service type, by languages offered and by client type. Page numbers correspond to the entry for the agency. To quickly locate a particular agency in this Directory, refer to the Alphabetic Agency Index on page 1-3. To locate agencies in a particular city, refer to the Municipalities Index on page 1-9.

ARF resources are listed in Appendix A. Appendix B provides a list of aboriginal addiction treatment resources and Appendix C lists additional resources available from the ARF.

LANGUAGE
Those agencies on the DART database that have specified that they routinely offer services in French will have their agency information listed in both official languages.

MODE D'EMPLOI DU RÉPERTOIRE

STRUCTURE
Les organismes spécialisés en toxicomanie sont classés géographiquement selon les régions desservies par les conseils régionaux de santé.

Les six régions desservies par les CRS sont classées du sud au nord. À l'intérieur de ces régions, les villes sont classées par ordre alphabétique.

INDEX ET ANNEXES
Les index qui commencent à la page 1-3 classent les organismes selon les types de traitements, les langues parlées au sein de l'organisme et les types de clients admis. Les numéros de pages correspondent aux indications données. Pour en savoir plus, consulter l'«échantillon d'inscription» qui se trouve à la page suivante. Pour trouver rapidement un organisme inscrit sur cette liste, consulter les index alphabétiques à la page 1-3. Pour connaître les organismes situés dans une ville donnée, consulter l'index des municipalités de la page 1-9.

Les ressources de la ARF sont énumérées à l'annexe A. L'annexe B contient une liste des traitements de la toxicomanie offerts aux populations autochtones. L'annexe C contient une liste des ressources supplémentaires disponibles à la ARF.

LANGUE
Les renseignements concernant les organismes inscrits dans la base de données DART et ayant précisé offrir régulièrement des services en français apparaîtront dans les deux langues officielles.
The following sample explains the content of the entry for each agency and the main service(s) it offers.

**CITY IN WHICH AGENCY IS LOCATED**

**Agency Description:** Statement of agency goals, mandate, philosophy and clientele.

**Services Offered:** See next page for definitions of service types used by DART. Due to space limitations, the services described in detail below are comprehensive assessment (offered by an Assessment and Referral Centre), detoxification, outpatient, day/evening, short-term and long-term residential. An agency may offer more than one of these services.

**Service Description:** SERVICE TYPE (See definitions on page x) Name of service if it differs from the agency name. Location: Address of service if it differs from the Main Office Address. Contact: Name of staff to contact if interested in this service (phone number if different than the agency phone number). Hours: Hours service is offered (M, Tu, W, Th, F, Sa, Su; 24-hour clock, e.g., 3:30 p.m. = 1430). Clients: Age range (0-99 = no set limits) and gender. Languages: Languages in which service can be arranged. Area Served: Geographical area served. Service Note: Details about the service provided, which may include types of groups, frequency of meetings, average length of program, service philosophy, etc. Access Notes: Details on admission criteria or any factors that may affect the general accessibility of the service to particular clients, including restrictions, requirements or opportunities of interest to potential clients. Other Offices: Municipality of satellite offices, if any. (Phone number if different from agency level.)

ÉCHANTILLON D'INSCRIPTION

L'échantillon suivant explique le contenu de l'inscription de chaque organisme ainsi que les principaux services qu'il offre.

VILLE DANS LAQUELLE L'ORGANISME EST SITUÉ

NOM DE L'ORGANISME SPÉCIALISÉ EN TOXICOMANIE

Adresse du bureau principal  Directeur : Chef de l'organisme
Municipalité, province  Téléphone : Numéro de téléphone
Code postal  Télécopieur : Numéro de télecopieur

Description de l'organisme : Énoncé des objectifs de l'organisme, son mandat, sa philosophie et sa clientèle.

Services offerts : Consulter la page suivante pour connaître les définitions des types de services utilisés par DART. En raison des contraintes d'espace, les services décrits ci-dessous sont : évaluations complètes (offertes par un centre d'évaluation et d'orientation), désintoxication, traitement en consultation externe, traitement de jour ou de soir, traitement de courte durée en établissement, traitement de longue durée en établissement. Un organisme peut offrir plus d'un de ces services.

Description des services : TYPE DE SERVICE (voir les définitions à la page xi.) Nom du service si celui-ci est différent du nom de l'organisme.

Emplacement : Adresse du service si celle-ci est différente de l'adresse du bureau principal.

Référence : Nom de la personne avec qui communiquer si intéressé par ce service (Numéro de téléphone si celui-ci est différent du numéro du bureau principal.)

Heures d'ouverture : Heures durant lesquelles le service est offert. (Lun. mar. mer. jeu. ven. sam. dim.)

Clientèle : Groupe d'âge (0 à 99 = pas de limite d'âge) et sexe.

Langues : Langues parlées à l'intérieur du service.

Région desservie : Région géographique desservie.

Autre information - service : Détails sur les services offerts, notamment les types de groupes, la fréquence des rencontres, la durée moyenne du programme, la philosophie du service, etc.

Autre information - accès : Détails sur les critères d'admission ou sur tout autre facteur pouvant influer sur l'accès général de certains clients au service, entre autre les restrictions, les exigences ou les occasions d'intérêt aux clients éventuels.

Bureaux : Municipalité des bureaux satellites, s'il y a lieu. (Numéro de téléphone si celui-ci est différent du numéro de l'organisme principal.)

EXPRESSIONS ET CODES UTILISÉS PAR DART (pouvant se retrouver dans les inscriptions):

AA/NA/CA  Alcooliques Anonymes/Narcotics Anonymous/Cocaine Anonymous
AEA  Adolescents d'alcooliques
Centres O/É  Centres d'orientation et d'évaluation
SAE  Société d'aide à l'enfance
SCHL  Société canadienne d'hypothèque et de logement
MSSC  Ministère des Services sociaux et communautaires de l'Ontario
SCC  Service correctionnel du Canada
PPF  Programme de prestations familiales
AGBS  Assistance générale en bien-être social
interne  à l'intérieur de l'organisme
MSGSC  Ministère du Solliciteur général et des Services correctionnels de l'Ontario
PNLAADA  Programme national de lutte contre l'abus de l'alcool et des drogues chez les autochtones
PSO  Protection-santé de l'Ontario (anciennement OHIP)
PAC  Prestations d'assurance-chômage
YMCA/YWCA  Young Men's/Women's Christian Association
DEFINITIONS

AGENCY
Treatment agencies listed in this Directory provide a variety and range of services for their clients. Some treatment agencies are free-standing, meaning that they are not tied administratively to other organizations. Other agencies are embedded, meaning that they deliver their specialized alcohol and drug services within a larger, more generic organization, such as a non-medical detoxification centre operating under the auspices of a general hospital.

SERVICE
This refers to clinical and other activities available to clients, specifically different treatment options along the continuum of care. In a small number of instances, one agency may offer only one type of service (e.g., some detoxification centres). In many instances, however, an agency will offer more than one service. For example, a non-residential treatment agency may offer outpatient counselling, a day/evening service and continuing care.

DEFINITIONS OF SERVICES:
Comprehensive Assessment: Systematic procedures for the identification of a client's major strengths and problem areas, culminating in a treatment plan and referral(s) for assistance.

Detoxification: Services provided to clients intoxicated or in withdrawal from alcohol and/or other drugs. These may be provided under medical supervision or in a non-medical detoxification centre.

Outpatient Treatment: Treatment provided on a non-residential basis, usually in regularly scheduled sessions (e.g., one to two hours per week).

Day/Evening Treatment: Intensive, structured non-residential treatment, typically provided five days or evenings per week (e.g., three to four hours per day).

Short-term Residential: Treatment provided for an intensive, structured period of time while the client resides in-house. The length of stay is typically less than 40 days.

Long-term Residential: Treatment and/or rehabilitation services provided for a period of time typically longer than 40 days. These programs include recovery homes, halfway houses, three-quarter-way houses and therapeutic communities.

Intake/Screening: Procedures for determining a client's eligibility for the services provided by the agency, registering the client into the appropriate services, and providing an overview of the services provided, expectations, rules, etc.

Walk-in and Crisis Services: A service that emphasizes ease and immediacy of access and that provides assistance, support, advice or attention to urgent medical, psychosocial and basic needs.

Family Intervention: A service targeted specifically at family members to provide education, assistance and/or other support, whether or not the addicted individual is in treatment (may be non-residential or residential). This is distinct from involvement of the family (significant others) in a client's assessment or treatment plan where this is provided on an as-needed basis.

Continuing Care: Resources or services that provide continuing encouragement and additional services as needed during or following client's completion of a treatment plan.

Supportive Stabilization: Resources or services that provide a supportive environment to a client being stabilized prior to treatment; pre-treatment.
DÉFINITIONS

ORGANISME
Les organismes de traitement inscrits dans ce répertoire offrent une vaste gamme de services pour leurs clients. Certains traitements organismes sont autonomes, en ce sens qu'ils ne sont pas liés, du point de vue administratif, à d'autres organismes. D'autres organismes sont intégrés parce qu'ils offrent des services spécialisés de traitement des problèmes d'alcool et de drogue au sein d'un organisme plus vaste et plus général. On pense, par exemple, à des centres de désintoxication non médicale ou des établissements de traitement qui mènent leurs activités sous les auspices d'un hôpital général, et à des organismes d'évaluation ou de consultations externes qui sont parrainés par des organismes communautaires.

SERVICE
Ce terme désigne les activités cliniques ou autres aux quelles les clients ont accès, en particulier les diverses options de traitement de l'éventail de soins. Quelques organismes n'offrent qu'un seul type de service (p. ex., certains centres de désintoxication). Très fréquemment, cependant, les organismes dispensent plus d'un service. Par exemple, un organisme offrant un traitement en consultation externe peut prodiguer des services de consultation, un service de jour ou de soir et des soins continus.

DÉFINITION DES SERVICES:
Évaluation complète : Procédés systématiques utilisés pour identifier les points forts et les problèmes du client; cette démarche conduit à l'établissement d'un plan de traitement et à des recommandations pour obtenir de l'aide.

Désintoxication : Services offerts aux clients intoxiqués ou qui sont en sevrage de l'alcool ou d'autres drogues. Ces services peuvent être offerts sous surveillance médicale ou dans un centre de désintoxication non médicale.

Traitement en consultation externe : Traitement fourni sans séjour en établissement et, habituellement, dans le cadre de séances régulières (p. ex. une ou deux heures par semaine).

Traitement de jour ou de soir : Programme de traitement intensif et structuré qui ne prévoit pas de séjour en établissement. Ces programmes sont habituellement offerts cinq jours ou cinq soirs par semaine (p. ex. trois ou quatre heures par jour).

Traitement de courte durée en établissement : Traitement intensif et structuré au cours duquel le client réside dans un établissement. La longueur du séjour est habituellement inférieure à 40 jours.

Traitement de longue durée en établissement : Le traitement ou les services de réadaptation couvrent habituellement une période supérieure à 40 jours. Ces programmes sont offerts par des centres de rétablissement, des foyers de transition et des groupes thérapeutiques.

Admission/sélection : Procédés utilisés pour déterminer l'admissibilité du client aux programmes offerts, pour inscrire le client dans le programme de traitement voulu et pour expliquer les services offerts, les attentes, les règlements, etc.

Services sans rendez-vous et services d'urgence : Services axés sur l'accès immédiat à du soutien ou de l'aide, des conseils ou des services médicaux et psychosociaux, ainsi que des services essentiels urgents.

Intervention auprès de la famille : Service d'éducation, d'assistance ou de soutien offert spécialement aux membres de la famille d'une personne toxicomane, qu'elle suive un traitement ou non. Ce service, qui peut être offert en consultation externe ou en établissement, différe de la participation de la famille (ou des personnes proches) à l'évaluation ou au traitement du client, qui se fait en fonction des besoins.
Soins continus : Ressources ou services prévoyant un encouragement continu ou une aide supplémentaire pendant ou après la réalisation du plan de traitement.

Stabilisation pré-traitement : Ressources ou services visant à fournir au client tout le soutien dont il a besoin avant de passer au traitement.

Addiction Research Foundation
Community Programs Department

Service des programmes communautaires de la
Fondation de la recherche sur la toxicomanie
ARF COMMUNITY PROGRAMS

ADDITION RESEARCH FOUNDATION
COMMUNITY PROGRAMS DEPARTMENT

The Community Programs Department is the community outreach branch of the Addiction Research Foundation (ARF). Through the 26 local offices of the ARF, its staff provide prevention, health promotion and treatment service development programs aimed at more effective recognition, prevention and treatment of alcoholism and other addictions.

The Department provides services to the people of Ontario in the following ways:

a. assists in implementing community-based addictions programs for schools, municipalities, social service personnel, industry, minority groups and the public;
b. develops and operates demonstration projects in collaboration with various employers and agencies in the health, social and educational sectors;
c. trains health and social service staff in addictions and providing information to the people of Ontario;
d. conducts workshops and community forums for educators, health care professionals and representatives of business and labor.

MAJOR PROGRAM PRIORITIES

A. Prevention and Health Promotion

The Department implements policies, projects and activities designed to increase public knowledge and awareness of the effects of problematic use of alcohol and other drugs, and to encourage the adoption of preventive and health promotion measures.

Specific attention is directed at the following target groups:

a. municipalities: to develop alcohol management policies and practices for municipally owned recreation facilities and parks as a community risk reduction prevention strategy;
b. local district health councils, health, social services and community agencies, and the public: to increase overall awareness and knowledge of the effects of alcohol and other substances, and to encourage alternatives to substance use and abuse;
c. teachers and school boards in Ontario: to develop and implement alcohol and drug education policies, curricula and teacher training programs;
d. communities and members of the driving public: to develop programs to reduce the threat to public safety caused by driving or operating recreational vehicles while under the influence of alcohol or other drugs;
e. persons who use alcohol and/or other drugs in public places and worksites: to identify substance use that represents a threat to the health and safety of themselves and others;
f. parents and youth group leaders: to recognize, prevent and manage alcohol- and other drug-related problems;
g. ethnic, cultural and age-specific groups: to adopt low-risk drinking and drug-taking practices;
h. citizen advocacy groups: to support their efforts to increase public awareness and knowledge of the effects of alcohol and other drug use, and measures to reduce the incidence of drug-related problems.

B. Treatment Services Development

A major program priority of the Foundation’s field staff is to work in close collaboration with service providers and other relevant groups, to establish a province-wide network of coordinated community-based alcohol treatment systems of assessment and referral, counselling, primary care and follow-up, and making provision for community living arrangements (such as detoxification centres and recovery homes) for those requiring such care.
In pursuit of this priority, field staff collaborate with major planning bodies such as district health councils and social planning councils, public health agencies, hospitals, and various other health and social agencies to develop and improve the treatment services available to persons with alcohol-related problems. Some of the major program thrusts in this area include:

a. working with addictions agencies, community planners, and informing them about the nature and extent of alcohol problems and the need for community-based alcohol treatment services;
b. participating in needs assessment studies with district health councils to determine gaps in treatment services;
c. training local agency staff regarding various aspects of alcohol use and treatment approaches, including quality enhancements.

C. Workforce Health Programs

Another program priority of the Department is to develop workforce health programs aimed at increasing the capability of the occupational community to understand, prevent and manage the problems and costs resulting from the use and abuse of alcohol and other drugs in the workplace. In pursuit of this objective, the Foundation field staff work closely with E.A.P. councils and provincewide organizations to develop policies and programs.

---

**SERVICE DES PROGRAMMES COMMUNAUTAIRES DE LA FONDATION DE LA RECHERCHE SUR LA TOXICOMANIE**

Le Service des programmes communautaires fournit aux collectivités les services extérieurs établis par la Fondation de la recherche sur la toxicomanie (la ARF). Son personnel, réparti dans 26 bureaux locaux, offre des programmes de prévention, de promotion de la santé et d’organisation des services de traitement afin de maximiser le dépistage, la prévention et le traitement de l’alcoolisme et des autres toxicomanies.

Ce service dessert la population de l’Ontario comme suit:

a. facilite l’application de programmes communautaires axés sur la toxicomanie et destinés aux établissements d’enseignement, aux municipalités, aux services sociaux, aux entreprises, aux minorités et au grand public;
b. met en œuvre des projets de démonstration en collaboration avec divers employeurs et organismes du secteur de la santé, des services sociaux et de l’éducation;
c. donne une formation en toxicomanie au personnel des services de santé et sociaux et diffuse des renseignements à la population de l’Ontario;
d. organise des ateliers et des débats à l’intention des éducateurs, des professionnels de la santé et des représentants des entreprises et des syndicats.

**PRIORITÉS EN MATIÈRE DE PROGRAMMATION**

*A. Prévention et promotion de la santé*

Le service met en application des politiques, des projets et des activités ayant pour but d’élargir les connaissances du public, de le sensibiliser aux effets de la consommation abusive d’alcool et d’autres drogues, et d’encourager l’adoption de mesures preventives et d’un mode de vie sain.
Une attention spéciale est apportée aux groupes-cibles suivants :

a. les conseils régionaux de santé, les organismes de santé, de services sociaux et de services communautaires, ainsi que le grand public : intensifier la sensibilisation globale aux effets de l'alcool et d'autres substances, et encourager les solutions de rechange à l'usage et l'abus de l'alcool et des autres drogues;

b. les enseignants et les conseils scolaires de l'Ontario : élaborer et appliquer des politiques d'éducation sur l'alcool et les drogues, ainsi que des programmes de formation des enseignants dans le domaine de l'éducation sur la drogue;

c. les municipalités : en guise de stratégie de réduction du risque dans les collectivités, mettre en oeuvre des politiques et des pratiques de gestion de l'alcool applicables aux installations et aux parcs municipaux;

d. les collectivités et les conducteurs de véhicules automobiles : mettre au point des programmes pour atténuer la menace que représente, pour la sécurité publique, la conduite d'un véhicule sous l'influence de l'alcool ou d'une autre drogue;

e. les personnes qui consomment de l'alcool ou d'autres drogues dans des lieux publics ou au travail : identifier les situations où la consommation d'alcool et de drogues constitue une menace pour la santé et la sécurité de l'usager, et celles d'autrui;

f. les parents et les responsables de groupes de jeunes : reconnaître, prévenir et prendre en charge les problèmes liés à l'alcool et aux drogues;

g. les groupes ethniques ou culturels, et les groupes d'âge précis : adopter des habitudes de consommation modérée de l'alcool et des autres drogues;

h. les groupes de défense des citoyens : appuyer leurs initiatives de sensibilisation du public aux conséquences de la consommation d'alcool et d'autres drogues, de même que les mesures pour réduire l'incidence des problèmes liés à l'alcool et aux drogues.

B. Établissement des services de traitement

L'une des grandes priorités du personnel régional de la Fondation est de travailler, en collaboration étroite avec les fournisseurs de services et autres groupes concernés, à l'établissement d'un réseau provincial communautaire de traitement de l'alcoolisme d'évaluation et d'orientation, de counseling, de soins primaires, de suivi et, pour les personnes qui en ont besoin, de services d'hébergement dans la communauté (comme les centres de désintoxication et les foyers de rétablissement).

Pour concrétiser cet objectif prioritaire, le personnel régional collabore avec les principaux organismes de planification comme les conseils régionaux de santé et les conseils de planification sociale, les organismes de santé publique, les hôpitaux et divers autres organismes de santé ou de services sociaux, afin de mettre sur pied et d'améliorer les services de traitement aux personnes qui ont des difficultés liées à l'alcoolisme. Voici quelques-unes des principales activités dans ce domaine :

a. collaborer avec les organismes spécialisés en toxicomanie et les planificateurs communautaires, et leur expliquer la nature et l'ampleur des problèmes liés à l'alcoolisme, ainsi que la nécessité de services communautaires de traitement de l'alcoolisme;

b. de concert avec les conseils régionaux de santé, participer à une évaluation des besoins des collectivités ontariennes afin d'identifier les lacunes des services de traitement;

c. former les employés des organismes locaux pour les familiariser avec les différentes facettes de la consommation d'alcool et les approches thérapeutiques, y compris l'amélioration de la qualité.

C. Programmes de santé en milieu de travail

Le service des programmes communautaires a comme autre priorité la création de programmes de santé en milieu de travail, afin que les employeurs et employés soient plus en mesure de comprendre, prévenir et gérer les problèmes et frais qu'entraînent l'usage d'alcool ou d'une autre drogue au travail. Pour réaliser cet objectif, le personnel régional de la Fondation participe à l'élaboration de politiques et de programmes, en collaboration avec les conseils chargés des Programmes d'aide aux employés et diverses organisations provinciales.

Resources for Native Peoples

Ressources à l'intention des autochtones
GENERIC ROLE OF NATIONAL NATIVE ALCOHOL AND DRUG ABUSE (NNADAP) AND COMMUNITY HEALTH REPRESENTATIVE (CHR) COORDINATORS IN ONTARIO REGION

The coordinators' objective is to provide advice and support to community-based CHRs and NNADAP prevention workers. As required, the coordinators may attend Chief and Council meetings and/or Health Committee meetings to respond to information requests. Coordinators provide assistance on health-related matters and training matters, and they address concerns relating to funding, contribution agreements and workplans. The coordinators may act as advocates and serve as liaison between First Nations, their community-based CHRs and NNADAP workers, and funding agencies such as the Medical Services Branch. Coordinators will continue to assist the First Nations community-based workers to promote their networking in their struggle against alcohol and drug abuse, and to address the related health and social issues that result from substance abuse.

RÔLE GÉNÉRIQUE DES COORDONNATEURS DU PROGRAMME DE LUTTE CONTRE L'ABUS DE L'ALCOOL ET DES DROGUES CHEZ LES AUTOCHTONES (PLCAADA) ET DES REPRÉSENTANTS EN SANTÉ COMMUNAUTAIRE (RSC) DANS LES RÉGIONS DE L'ONTARIO

L'objectif des coordonnateurs est de conseiller et d'appuyer les intervenants communautaires des RSC et du PLCAADA qui travaillent dans le domaine de la prévention. Comme prescrit, les coordonnateurs peuvent siéger aux réunions des chefs et du conseil ou aux réunions du Comité de la santé afin d'être en mesure de répondre aux demandes de renseignements. Ils peuvent apporter leur concours sur les questions liées à la santé et à la formation et traiter des préoccupations liées au financement, aux accords de financement et aux plans de travail. Les coordonnateurs peuvent jouer le rôle de défenseur et de lien entre les Premières Nations, les intervenants communautaires des RSC et du PLCAADA et les organismes de financement comme la Direction des services médicaux. Ils continueront d'aider les intervenants communautaires des Premières Nations à faire la promotion de leur réseau d'entraide dans le cadre de la lutte qu'ils mènent contre l'usage abusif d'alcool et de drogue et à aborder les questions de santé et sociales découlant de la toxicomanie.

ADDITIONAL RESOURCES AVAILABLE FROM THE ADDICTION RESEARCH FOUNDATION

Alcohol and Drug Treatment in Ontario: A Guide for Helping Professionals
Free in Ontario
44 pages
Order code: PZZ93

This guide is designed to help health and social services professionals who are not addictions specialists get clients on the road to treatment. The guide summarizes the options available in Ontario's treatment system, including assessment and referral services and self-help groups.

Alcohol and Drug Treatment in Ontario: A Guide for People Seeking Help
Free in Ontario
Brochure
Order Code: PZZ91

This brochure can be offered to health and social service clients to help them make choices about treatment options in Ontario. It answers common questions regarding services such those related to cost, types and lengths of treatment, and services available for people with special needs.

Alcohol and Drug Problems: A Practical Guide for Counsellors
$34.95 (Ontario PST exempt)
453 pages
Order code: P563

Written by experts in various legal and medical areas, this book offers "hands-on" information to frontline treatment professionals about alcohol and drug use. It explores a wide range of topics, including ethics and professional issues, relapse prevention, AIDS, clients on probation or parole, and workplace issues.

(Cette publication n'est pas disponible en français)

Directory of Client Outcome Measures for Addictions Treatment Programs
$39.00 (Ontario PST exempt)
284 pages
Order code: PG059

This directory includes information on more than 25 measures designed to assess client outcomes in three main areas:
- substance abuse, including alcohol and drug consumption, consequences of use, drinking and drug-using situations, self-efficacy and coping
- other life areas, such as psychological well-being, physical health and cognitive functioning, social and leisure activities, and legal, financial and work status
- treatment response, including client satisfaction and feedback.

The reviews of clinical tools include: information on target population, administrative reliability, scientific validity and ability to measure change. Some samples of actual measures are reproduced.

Treatment providers can use these clinical tools to monitor the progress of clients, pinpoint what works best for different client groups, and evaluate the success rate of their programs over time.

The Evaluation Casebook: Using Evaluation Techniques to Enhance Program Quality in Addictions
$39.00 (Ontario PST exempt)
274 pages
Order code: PG068

This publication offers straightforward advice on how to conduct effective program evaluation. Realistic examples illustrate a wide variety of evaluation techniques, ranging in scope from simple to complex, and from modest to expensive. Through a step-by-step format, you'll discover how to receive clear answers to your questions; collect data; present your findings; and put your results to work. All techniques are rated for cost and level of complexity. An excellent resource for novice or experienced program evaluators.
RESSOURCES SUPPLÉMENTAIRES DISPONIBLES À LA FONDATION DE LA RECHERCHE SUR LA TOXICOMANIE

Traitement des problèmes liés à l'usage d'alcool et de drogues en Ontario : Guide pour les professionnels aidants.
Gratuit en Ontario
44 pages
Code de commande : PZZ94

Ce guide est conçu pour aider les professionnels de la santé et des services sociaux non spécialisés en toxicomanie à orienter les clients vers un traitement. Il résume les options offertes par le réseau de traitement ontarien, notamment les services d'évaluation et d'orientation ainsi que les groupes d'initiative personnelle.

Le traitement des problèmes d'usage d'alcool et de drogue en Ontario : Un guide pour les personnes qui recherchent de l'aide
Gratuit en Ontario
Dépliant
Code de commande : PZZ92

Ce dépliant peut être distribué aux clients des services sociaux et de santé afin de les aider à choisir un traitement en Ontario. Il répond à des questions courantes sur les services, par exemple les types de traitements, le coût et la durée, et les services disponibles aux personnes ayant des besoins particuliers.

Version française intitulée Répertoire des mesures d'évaluation de la situation des clients en phase de suivi à l'usage des programmes de traitement de la toxicomanie
39 $ (Non asujetti à la taxe de vente de l'Ontario)
303 pages
Code de commande : PG065

Ce répertoire contient des renseignements sur plus de 25 mesures conçues pour évaluer les besoins des clients dans trois domaines principaux :
- toxicomanie, notamment usage d'alcool et de drogue, les conséquences de l'usage, situations qui déclenchent l'usage, compétence personnelle et adaptation;
- autres aspects de la vie, tel bien-être psychologique, santé physique et fonctions cognitives, activités sociales et de loisir, et état juridique, financier et professionnel;
- la réponse au traitement, dont la satisfaction et les commentaires du client.

Les outils cliniques examinés comprennent des renseignements sur la population cible, la fiabilité administrative, la validité scientifique et la capacité de mesurer le changement. Quelques exemples de mesures existantes sont fournis.
Les fournisseurs de traitement peuvent utiliser ces outils cliniques afin de mesurer le progrès des clients, identifier ce qui convient le mieux à chaque groupe de clients et évaluer le taux de succès de leur programmes après un certain temps.

Version française intitulée Guide d'évaluation : Illustration de techniques visant à améliorer les programmes de traitement de la toxicomanie
39 $ (Non asujetti à la taxe de vente de l'Ontario)
274 pages
Code de commande : PG069

Cette publication renferme des conseils pratiques sur la manière efficace d'évaluer un programme. Des exemples réalistes illustrent un large éventail de techniques d'évaluation simples ou complexes et coûteuses ou modestes. Grâce à sa formule par étapes, vous découvrirez comment poser des questions qui engendrent des réponses claires, recueillir des données, présenter et appliquer vos résultats. Les niveaux de complexité et de prix de toutes les techniques sont indiqués. Une excellente ressource pour les responsables de l'évaluation des programmes, qu'ils soient novices ou expérimentés.
